& Natural Resources

Purpose

Forests, when sustainably managed, make important contributions both to people and to the planet, supporting livelihoods, providing clean air and water, and conserving biodiversity. Sustainable forest management and Best Management Practices (BMPs) are proven, common sense measures, methods and practices which enhance the economic, social and environmental values of forests, for the benefit of present and future generations. In this webinar Drs. Jay Shelton and Puneet Dwivedi will discuss the science behind sustainable forest management and BMPs and explore the ways in which they are critical to good forestry management in Georgia.

Who Will Benefit?

Private and state foresters, loggers, mill managers, sustainability managers, non-profits, and members of forestry associations will benefit from this course.

Instructors

Dr. Puneet Dwivedi is an Associate Professor of Sustainability Sciences at the University of Georgia Warnell School of Forestry and Natural Resources. He specializes in the area of wood-based energy development, forest certification, land use change modeling, and family forest landowners.

Dr. Jay Shelton is an Associate Professor of Fisheries at the University of Georgia Warnell School of Forestry and Natural Resources. He specializes in water quality management. In 2018 Jay led a team of faculty, staff, and students from the University of Georgia in habitat restoration efforts on the Oconee River near Athens, Georgia. As a result of this project, the Warnell School was recognized as "Clean Water Heroes" by the Georgia Water Coalition, receiving their Clean 13 Award.
