Daniel B. Warnell School of Forestry and Natural Resources

Recreational Pond Management

July 30 - 31, 2015

Instructors: Jay Shelton, Brian Simmons, Kris M. Irwin
Flinchum's Phoenix, 650 Phoenix Road, Athens, Georgia

WARNELL
SCHOOL OF FORESTRY AND NATURAL RESOURCES
THE UNIVERSITY OF GEORGIA

About this Course

There are over 100,000 acres of private ponds in Georgia being managed for sportfish production. Sportfish ponds and small impoundments provide significant opportunity to enjoy the outdoors and enhance property value. Properly managed ponds can provide an abundant supply of fish for food and recreation, attract wildlife, add aesthetics and increase value of both urban and rural lands. A combination of classroom presentations and hands-on field activities will provide participants the opportunity to develop new knowledge and basic skills associated with pond management in Georgia.

Objectives

The primary objective of this course is to provide participants with the opportunity to develop basic knowledge and skills about pond management that produce sustainable, high quality fishing. At the end of this course, participants will be able to:

- Describe the basic tenets of pond construction, renovation, and maintenance;
- Explain activities associated with pond stocking and management strategies;
- Identify common aquatic plants in Georgia ponds; and
- Conduct a pond evaluation (fish and water quality).

Who Should Attend?

Landowners, managers, consultants, or any person desiring to learn more about the management of ponds to produce high quality fishing should attend this course. The benefit participants receive will be directly related to their participation. This course is designed to be interactive; open discussions and questions are encouraged. Also, participants must be willing to get wet and muddy along with the instructors.

Instructors

Dr. Jay Shelton has a Ph.D. in aquaculture and fisheries from Auburn University, and is a fisheries biologist with the Warnell School of Forestry and Natural Resources. For over 20 years he has developed publications and taught outreach programs on the subjects of sportfish pond management, aquatic plant management, and water quality.

Brian Simmons graduated from the University of Georgia with a Bachelor of Science in Forest Resources. He currently manages Owen & Williams Fish Farm, Inc. and owns Ultimate Pond Care Service, an electro-shocking and pond management company. Brian formerly served three years as president of the Georgia Aquaculture Association.

Dr. Kris M. Irwin is a member of UGA's Warnell School and specializes in forestry and natural resources outreach education. His work focuses on the design and development of educational materials and products for forest landowners and natural resource managers. In addition, Kris is an avid angler and will help participants develop a deeper understanding of the content and experience.
